

LEADERS IN HYGIENE TECHNOLOGY

Holistic Green Range

What is Eco Label?

The European Eco Label is a recognised accreditation awarded to products of the highest environmental and performance status. The Eco Label encourages companies to become more sustainable and produce products which are highly environmental throughout their whole life-cycle. Every aspect from the raw materials used to manufacture the product, right through to disposal of the product, are monitored. Environmental impact is measured at each stage of the products life-cycle.

To be awarded with Eco Label status, products must be put through rigorous testing and assessment to demonstrate that they are as effective as non eco friendly products. Each product is assessed under numerous criteria and compiled into individual product dossiers. All results are evaluated and verified by an independent body.

Environmental Commitment

The Holchem Group pride ourselves on supplying products and services that deliver quality hygiene solutions. We constantly review the performance of our cleaning products, equipment and systems to ensure they are as safe as possible and present the lowest hazard to personnel and the environment.

Managing the sustainability of our products and business is massively important to us. We aim to lessen the overall effect on the environment by taking into account:-

- Detergent use concentrations
- Water consumption
- Chemical miles

To achieve the lowest chemical miles inventory for our products we source many of our raw materials within a 30 mile radius of our production plant.

The Ecolabel accredited Holistic Green Range products have:-

- **Low impact on aquatic life**
- **Reduced use of hazardous raw material substances**
- **Low packaging waste**
- **Efficient cost in use formulations**
- **Cleaning performance independently assessed against market leading non-Ecolabel products**
