

Product Sheet – Boonsjet 681 Hose

The Boonsjet 681 hose is an excellent 1/2" medium pressure cleaning with a maximum working pressure of 200 bar.

These cleaning hoses can be used for rinsing or applying chemicals in the food and processing industry. These hoses are resistant to cold and hot water and common detergents and disinfectants.

The hose is pre-assembled and is equipped with stainless steel 1/2" male BSP ends. Both sides are equipped with a blue articulated rubber.

Advantages

- Blue, smooth, ozone, weather, heat and oil resistant outer jacket in NBR/PVC rubber
- Smooth inner surface in NBR rubber
- For all high-pressure applications up to 200 bar
- Temperature resistance up to 100°C (min. -40°C)
- Linen inlay implementation
- High flexibility
- Pleasantly manageable products due to its low weight
- Available in 6 standard lengths (also available on different lengths)
- Very sleek design and hygienic performance
- Anti-microbial protection layer for the food industry

Technical Data

- DN – inch 15 – 1/2"
- External Diameter 217 mm
- Internal Diameter 127 mm
- Pressure Max 200 bar
- Length 10, 15, 20, 25, 30 or 35 m
- Weight 300g / m
